PROLOGUE

Senior Full-Stack Developer and Technical Lead with 11 years' experience building production-grade, AI-augmented systems on Microsoft Azure, including APIs serving 2M+ requests/day at sub-200ms latency. Core strength is production readiness: reliability, observability and security at scale, paired with hands-on delivery of agentic AI tooling in real engineering workflows.

The route every role in order, and where it goes next

1. Diploma, CSE. 3 yrs from 2008.
2. B.Tech, CSE. 3 yrs from 2011.
3. Software Engineer, Pratian. 3 yrs 3 mo from Apr 2015.
4. BI Developer, Pratian. 1 yr 5 mo from Jul 2018.
5. Developer Associate, JLLT. 2 yrs 3 mo from Jan 2020.
6. Software Engineer 2, JLLT. 2 yrs from Apr 2022.
7. Senior Full-Stack Dev, JLLT. 2 yrs 4 mo from Apr 2024 to now.
8. AI Engineer: next. Not a role held, and not dated.

Quest log newest first

JAN 2020 → NOW 6 YRS 7 MO

JLL Technologies Centre of Excellence

Arrived building forms in OutSystems. Now the gate the rest of the organisation logs in through.

05 Senior Full-Stack Developer ●

Apr 2024 → now 2 yrs 4 mo

OBJECTIVES CLEARED

Engineered event-driven APIs processing **2M+** requests/day at sub-**200ms** latency.

Integrated a Claude-based bot into CI/CD pipelines for automated PR reviews, cutting review time by more than **50%**.

Built an MCP server as first-level support and onboarding contact for Technology Access Tool integration queries, fed end-to-end documentation to deflect business and technical users away from developer escalations.

RANK UP Software Engineer 2 → Senior Full-Stack Developer

Apr 2024

04 Software Engineer 2

Apr 2022 → Apr 2024 2 yrs

OBJECTIVES CLEARED

Led legacy-system decommissioning, migrating applications from ASP.NET MVC to .NET Core and modernising the underlying architecture.

Adopted an event-based architecture using Azure Functions and Kafka, and implemented disaster recovery for high availability.

Built self-service Datadog and Splunk dashboards, filterable by consumer, letting teams confirm API success or failure and drill into logs independently, 24/7. Cut issue-debugging effort by **70%**.

RANK UP Developer Associate → Software Engineer 2

Apr 2022

03 Developer Associate

Jan 2020 → Apr 2022 2 yrs 3 mo

OBJECTIVES CLEARED

Integrated organisation-level controlled authorisation in place of application-specific access, standardising and simplifying permissions management.

Partnered with teams across the globe to define integration strategies and deliver well-documented, maintainable solutions.

Documents behind role-based access, organisation-wide

- + Organisation-wide RBAC

HOW IT WORKED

MCP Support Server CURRENT

2026

MCP protocol

Answers integration questions so a developer does not have to

- + First-level support

HOW IT WORKED

UniForm SOLE DEVELOPER

2020-2022

+30% onboarding

A dynamic-forms platform for property onboarding, built solo

- + 30% faster onboarding
- + 30+ client entities

HOW IT WORKED

APR 2015 → DEC 2019 4 YRS 8 MO

Pratian Technologies Pvt. Ltd.

Learned the trade on American insurance claims. Left having turned a clipboard into a phone.

02 BI Developer

Jul 2018 → Dec 2019 1 yr 5 mo

OBJECTIVES CLEARED

Built BI dashboards in Tableau and Power BI that improved audit-operations efficiency by **30%**.

OBJECTIVES CLEARED

Delivered enterprise healthcare/EDI applications, reducing manual workloads by **40%**.

Created **20+** reusable components, cutting feature-delivery time by **40%** across teams.

Led vulnerability scanning and remediation using ZAP across 7 applications spanning 50 developers.

Achievements unlocked

 6 awards, all at JLL, cited verbatim**Security Champion**

Recognised for driving security-vulnerability remediation across Shared Services and GPT.

Nominated by the Vice President and Chief Architect · JLL Technologies · Apr 2026

Domain Expertise & Adaptability

Star Award · Going Beyond · Win Together

Recognised on the TAT Rebuild as the go-to expert for domain questions, for analytical work with Datadog and Splunk that shaped the rebuild strategy, and for mastering React quickly enough to contribute meaningful code straight away.

Nominated by Bandi Suresh · JLL Technologies · 4 Sept 2025

TAT UI Go Live

Star Award · Going Beyond · Win Together

For the technical ability and cross-team coordination behind a go-live that ran from planning through development, testing and troubleshooting.

Nominated by Surianto Surianto · JLL Technologies · 3 Sept 2025

Subject Matter Expert: Datadog

Star Award · Going Beyond · Communities

Datadog subject matter expert, consistently providing solutions and support during the onboarding of colleagues and multiple products. His expertise and dedication have made them an invaluable Common Services Champion. Moreover, his continuous contributions to TAT/ASA have significantly enhanced our operational efficiency.

Nominated by Natnael Getu · JLL Technologies · 22 Oct 2024

JLLT Technology Engineering Award

Engineering Award · JLL Technologies · Growth-Oriented

Part of the inaugural cohort of the first-ever Tech Engineering Team Awards.

Nominated by Lily Wynne · JLL Technologies · 4 Jan 2024

Certificate of Appreciation

Certificate of Appreciation · Ovations · Q3 2020

For delivering outstanding services.

Nominated by Ramesh Nair, CEO & Country Head, JLL India · JLL India · 30 Sept 2020 (approx.)

Party voices

colleagues and users, quoted as written

“It has been a pleasure working with Prasanna. He has been delivering great improvements in the uniForm product and addressing performance issues that existed in the legacy product. We are about to launch a new global initiative within Corporate Solutions with uniForm at the centre of this. This would not have been possible without Prasanna’s help.”

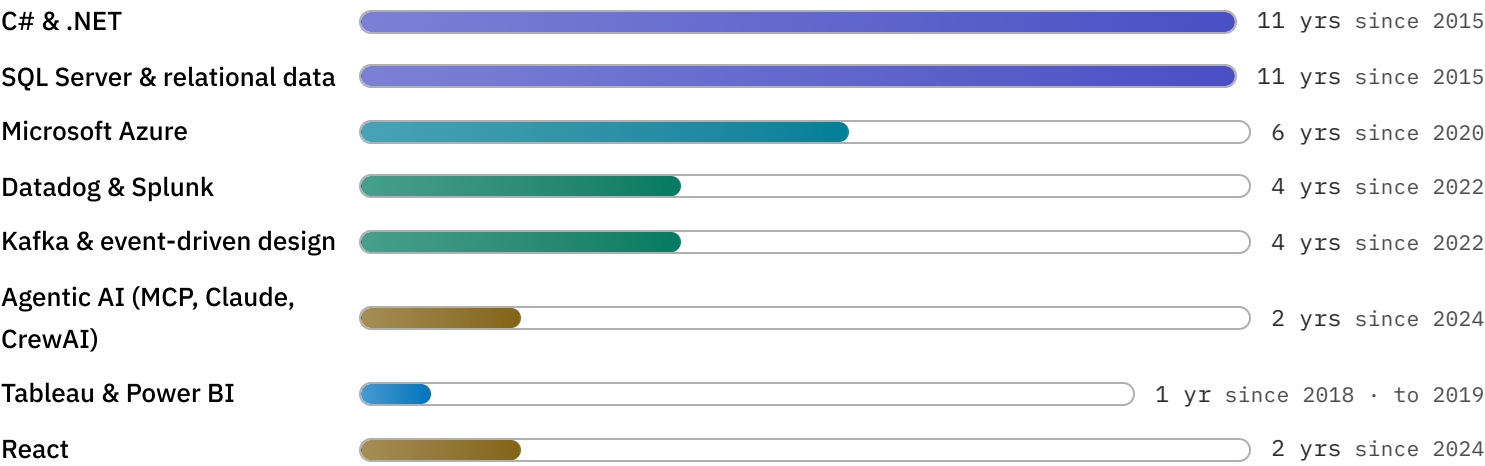

Paul Faulkner · Program & Development Manager, Corporate Solutions · Melbourne · 27 July 2020
At the six-month mark

“I love the new look, good job to the TAT Team. I have been waiting for these changes for years.”

Origin story where the habit started

2011-2014

Bachelor of Technology, Computer Science & Engineering

Sri Vasavi Institute of Engineering & Technology · JNTU Kakinada ·

70%

Years spent as much outside the syllabus as within it: MATLAB projects modelling and plotting real signals, and a run of hackathons where a deadline in hours forces decisions a semester never will.

Plenty was already shipping before the degree finished: three Windows 8 applications, Windows Phone apps, an entry in Microsoft Imagine Cup, and a Microsoft India App Fest certificate in 2013. The job offer arrived before graduation.

Government Polytechnic · State Board of Technical Education and Training · 78%

Three years at the layer where hardware and software still touch each other, which is the best possible place to start. Computer architecture and the fundamentals first, then the languages sitting on top of them.

Everything since has been a taller abstraction on the same habit: when something breaks, go down a level, then down another, until you find the smallest thing that could be wrong.

Student Management System: records, enrolment and results for a department

Computer architecture

Programming fundamentals

Student Management System

to 2008

School

Long before any of this was a job, the habit was already there, and it was not the syllabus. It was the entering of things: the science fair, the shortlist, the team.

- ◆ **Best Student Award**, chosen from a school of 800
- ◆ **State-level science fair**, after winning the district round

CURRENTLY

Senior engineering and technical-lead roles. 60-day notice period, open to relocation, employment visa required.

Every figure here is read from one source file. Impact percentages are self-reported and unaudited; ask, and I will explain how each was measured. A few entries are stated from memory rather than a certificate. Drawings are original.

There is always another manual thing. If yours has a name, I would like to hear it.
